

World Headquarters Facts

“Our new global headquarters brings together all of IAC’s New York City operations under one roof and provides a supporting infrastructure to grow our position as a leading player in ecommerce and other digital industries. Our goal was to create a building that reflects and facilitates the inventiveness of our businesses. With the help of Frank Gehry and many other leading design consultants, we have constructed a truly distinctive and functional building, which will bring our dynamic businesses closer together and help inspire their continued creativity.”

– Barry Diller, IAC Chairman & CEO

Bringing IAC’s Employees and Businesses Together

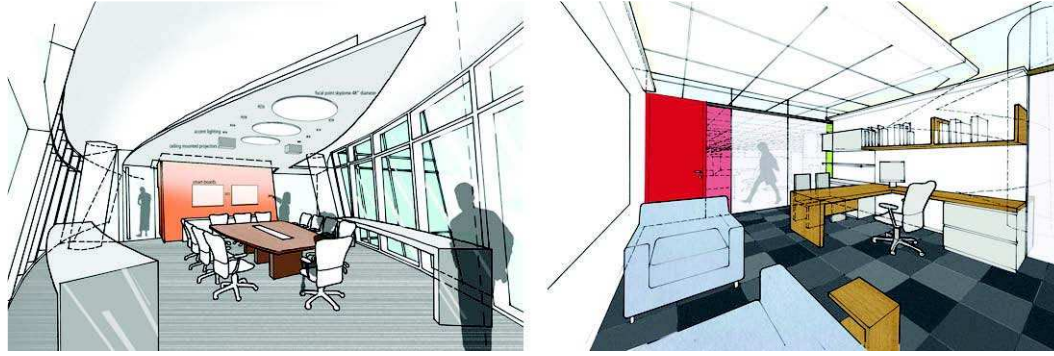

- Seven NYC office locations, 400 employees coming together under one roof
- Central location for IAC’s employees around the world to gather

Innovative Design and Construction

- World’s first glass curtainwall to be cold-warped – glass panels were bent on site
- Innovative application of sloped and angled concrete superstructure
- World’s largest high-resolution video wall located in ground floor lobby

Customized Interior to Increase Productivity

- Custom open office environment to enhance interaction among employees
- Floor plan designs and workstations combine style and functionality to accommodate specific needs of each business and working group
- Modular and flexible interior meeting spaces
- Entire building is Wi-Fi enabled to promote mobility and collaboration
- Advanced video conferencing facilities on all office floors
- Phone lines include mobile to VOIP transfer capabilities
- 100% of work spaces are exposed to natural light
